

Stage 27 hard-prediction package

The electroweak angle remains a matching anchor; the other two remain candidate outputs.

Λ_{TCV}

7.700e+18 GeV
candidate calibration
benchmark-dependent

m_{Φ_2}

1.0e-22 eV
candidate prediction
anchor-dependent
normalization

$\sin^2(\theta_W)$

0.375 +/- 0.050
external matching anchor
not internally derived
